

0 means that a test has failed (which is a good outcome!)

1 means that all tests passed (which is a bad outcome).

S0 weight 35/100. All other mutants (s1-s13) weight 1/13*65.

% is the number of zeros with the above weights. The higher the better.

Orange cells are those changed from the last result publishing. I'm extremely sorry for this.
